

## **EXCEL Program**

Crown Point Christian School recognizes that some students have unique academic strengths that extend beyond the general education curriculum. Our EXCEL program offers students the opportunity to engage with complex curriculum and challenges that go beyond what is presented in the classroom.

Through a variety of assessment measures (observation, recommendations, grades, assessment results, etc.) students may be asked to join the EXCEL program. In the EXCEL program, students are exposed to similar content and topics that their class is studying, but they have the opportunity to work through those topics at a different pace or even at a deeper and more challenging level.
