**Polio** Three doses of Polio are acceptable for all grade levels if the third dose was given on or after the 4<sup>th</sup> birthday and at least 6 months after the previous dose with only one type of vaccine used (all OPV or all IPV). For students in grades kindergarten through 5<sup>th</sup> grade the final dose must be administered on or after the 4<sup>th</sup> birthday, and be administered **at least 6 months** after the previous dose.

**Varicella** Physician documentation of disease history, including month and year, is proof of immunity for children entering preschool through 7<sup>th</sup> grade. Parental report of disease history is acceptable for grades 8-12.

**Tdap** There is no minimum interval from the last Td dose.

**MCV4** Individuals who receive dose 1 on or after their 16<sup>th</sup> birthday only need 1 dose of MCV4.

For children who have delayed immunizations, please refer to the 2015 CDC "Catch-up Immunization Schedule" to determine adequately immunizing doses. All minimum intervals and ages for each vaccination as specified per 2015 CDC guidelines must be met for a dose to be valid. A copy of these guidelines can be found at <http://www.cdc.gov/vaccines/schedules/>
